In fine *centuriam secundam* indicari putabant editores; fortasse ante M ne littera quidem ulla, sed tabellae ansatae lineae tantum fuerunt. CENTVRIA SECVNDA MILL · PASS · QVINQVE Simps.

**1176** Haec inscriptio inventa fuit Brovonaci XVI die Martii 1602 a quodam rustico. Lapis effoditur quinque pedes infra cursum fl. Loderi et Eimoti, quem multis meis et amicorum precibus tandem impetravi, Applebeiam transtuli; et in aedibus meis . . . nunc cernitur BAINBR. Ad Loderi et Eimoti confluentes a. 1602 erutum CAMD. HORSLEIUS sibi non liquere ait utrum exemplum sit antiquum an novicium (*I will not vouch for its being the original, which Camden saw or at least mentions*). In alio lapide infra *Bainbr.* scribendum curavit '*h(ic) l(apis) invent(us) e(st) Brovonaci.*'

Hayton 17. 2 MAPCO, 3 NLIO, 6 ⱤP traduntur. In fine mutilam esse indicavi ego.

Quod Hayton addit hunc lapidem fuisse in *Hangingshaw*, inde videtur concludendum, si omnino fuit in *Appleby*, non ipsum, sed exemplum novicium eo delatum esse post Bainbriggii tempus.

## LXXIII. VIAE EBVRACVM ET INDE AD VALLVM HADRIANI.

Miliaria duo Isuriensia (n. 1180. 1181) ad viam Eburaco versus septentriones pertinere dixi supra (p. 66). Inde a Cataractonio (supra cap. XXIV) is viae illius trames incipit, quem *Watlingstreet* dicunt quique per mansionem prope *Piersbridge* (cap. XXXIV) et Vinoviam (cap. XXXV) ad *Lanchester* (cap. XXXVI) atque deinde ad vallum Hadriani ducit. Huc pertinent miliaria n. 1183. 1184; quorum hoc fortasse referendum est ad viae eius ramum aliquem ad oram directum. Contra ad viam alteram a Cataractonio Luguvallium ducentem pertinent n. 1182. 1182*a*.
